Teaching and Learning Skills for Technicians
Course Types

HEaTED CPD courses have been carefully selected based on your continuous feedback. Many technical professionals have attended our courses and have applied their learning in order to advance their roles and ultimately their careers.

In order to make our CPD as accessible as possible we have different delivery options for the majority of our courses as described below:

**Onsite & Online**
These two courses are very similar. The only difference is we have modified some elements of the onsite activities and made them more appropriate for online delivery.

**Bitesize**
These are shorter versions of the course at a substantially discounted rate, to give you a flavour of what the full course is about.

*If you enjoy the bitesize course and want to complete the full onsite or online course afterwards, there will be a further discount.*
Technical staff are increasingly taking on teaching and demonstrating roles. Whether it is one-to-one training on specific techniques or small group training and demonstrating, this course will equip you with the tools you need to perform this role and contribute effectively to the student experience.

The course is recommended for technical staff with a role in training or teaching undergraduates, postgraduates, post-docs, new colleagues and apprentices.

It is relevant to all academic disciplines and will promote personal and professional development, which is valuable to both you and your employer.

Delivery will be by informal active learning sessions (group activities/discussion), discovery learning and reflection on current practice. Discovery learning forms a large part of the programme and as such collaboration amongst participants to discuss core concepts and reflect on current practice is actively encouraged, to create a more tailored learning experience.

Aim
The content of the course has been designed to cover key topics, linking theories of teaching and learning together with workplace experiences, thereby providing a more holistic approach to learning.

OUTCOMES

On completion of this course, participants will:

DAY 1:

- Be aware of the steps involved in designing and delivering learning activities
- Be able to define appropriate, measurable learning outcomes
- Know how to design learning activities that provide a balanced approach to learning
- Have learnt from the practical application of your learning

DAY 2:

- Have an awareness of relevant teaching and learning theory and methods
- Be able to suggest strategies used to create inclusive, engaging and motivating learning environments
- Have considered different approaches to learning and development in groups and identified those applicable to the area in which they work
- Be able to design methods of assessment and feedback appropriate to their defined learning outcomes
HEaTED (Higher Education and Technicians Education Development) is based at the University of Sheffield and is the leading provider of professional development for the technical workforce.
